

SebaKMT is a world-wide known developer and producer of measurement equipment for locating leaks in drinking water distribution networks. For over 60 years we have been a partner to all significant operators of water net-works. Our products make an important contribution to the reliable operation of our customer's installations. Since 2012 we are member of the Megger Group.

A member of Megger Group

We are growing...

...and have big goals! To complete our team in Baunach, we are currently looking for a

Business Unit Manager (m/f)

with worldwide responsibility for the water leak detection business.

Your responsibilities:

- Commercial and operational management of the German, European and American sales teams
- Development of market entry strategies and implementation
- Expansion of potential markets
- Customer presentations (worldwide)
- Acquisition of expert knowledge about the product portfolio (participation in training courses)

Your qualifications:

- A degree in engineering (water or economics)
- High assertiveness (possibly within own group structures)
- Good knowledge of water leak detection
- At least 10 years of professional experience with a similar range of tasks
- Quick learning ability, high motivation, resilience
- Language skills: German, English, other languages are beneficial
- Willingness to spend up to 50% of the time on business trips abroad
- Ideally, you have already worked for an international industrial company, a water utility, or in a similar field of activity.

Your benefits:

- Above-average salary package incl. company pension plan if interested
- Very good development opportunities, the position is expected to gain in competence areas over the next few years
- Education and training opportunities, if interested
- Several social events per year
- Idyllic rural area with affordable housing and support for your possible relocation

You can find a detailed presentation of our company at www.sebakmt.com/en and de.megger.com
