

Flow measurement – installation of six measuring points **without** interrupting the service

SebaFlow

Continuous zone monitoring and flow measurement with ultrasonics

Description

SebaFlow enables the continuous flow and zone monitoring of a pipe network section (DMA District Metering Area) through the use of ultrasonics.

Installation is managed without interrupting the water supply by means of attaching sensors to the outside wall of the pipe. SebaFlow is robust and maintenance-free, allowing installation without chamber construction.

The main advantages of the SebaFlow are:

- Maintenance-free flow measurement
- Early leak detection
- Short installation time without supply interruption
- No chamber construction necessary
- Precise measurements even at low flow rates
- Data transmission to the SebaCloud or to the own FTP server
- Battery-operated solution available as an option

Quantity

6 SebaFlow units (900 & 600mm ductile iron pipe)

Period

November 2016 - ongoing

Customer

Aguapen-EP,
Ecuador
